

◀ **WOW! AGILE AND THE TOOLBOX** **AN OPERATING SYSTEM FOR EXECUTION**

Helping organisations turn strategy into measurable outcomes

Most organisations do not struggle with strategy.

Strategy breaks down when governance, prioritisation, and delivery operate in isolation.

Organisations today are overwhelmed by:

- fragmented governance
- disconnected prioritisation
- delivery bottlenecks
- transformation fatigue
- increasing AI pressure
- growing organisational complexity

The business impact:

- Slow execution. Poor alignment. Reduced business impact.

Strategy without execution capability creates organisational friction.

The WoW! Agile Toolbox

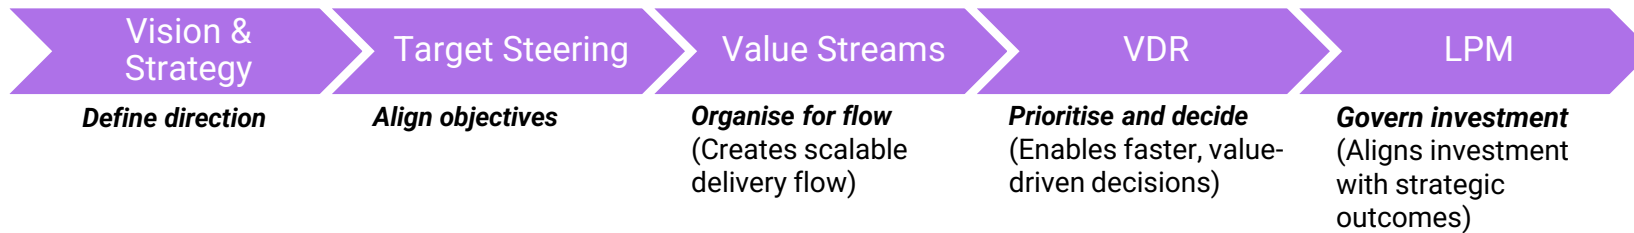

A connected execution system

The Toolbox connects strategic direction, governance, prioritisation, and delivery into one coherent execution model.

The Operating System for Execution

Strategy becomes executable when governance, prioritisation, and delivery operate as one connected system.

- **Measurable outcomes**
- **Faster decisions**
- **Better ROI**

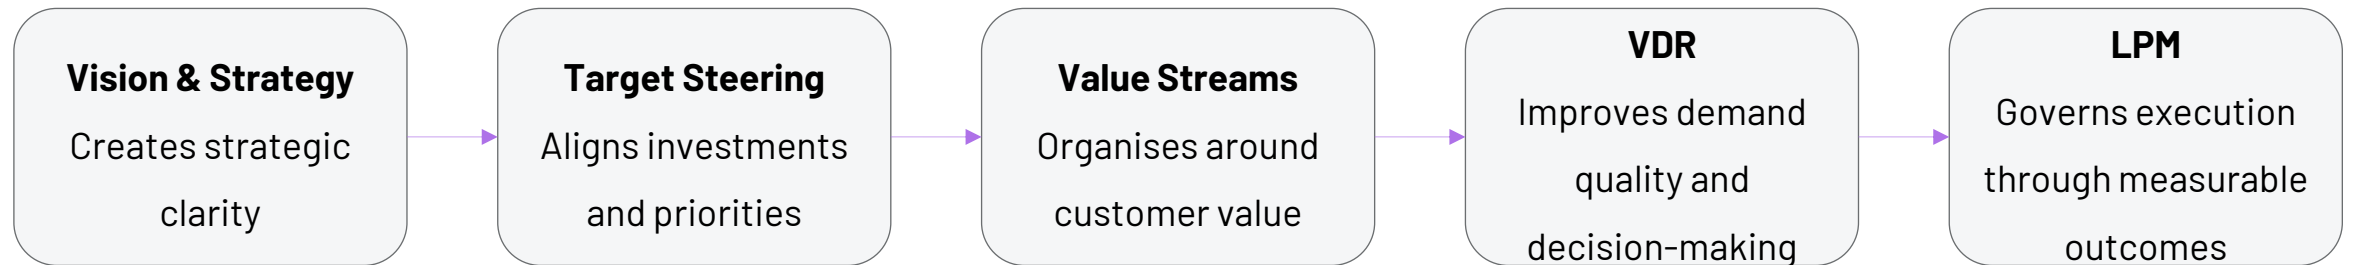

Enablement: QuickStart | Framework Flexibility | AI-Ready Organisation

Designed for real organisational complexity

Challenge	Toolbox Impact
Fragmented governance	Faster strategic alignment
Slow prioritisation	Faster decision-making
Delivery bottlenecks	Better execution flow
Siloed operating models	Stronger cross-functional collaboration
Transformation fatigue	Sustainable organisational adaptability
AI execution pressure	Greater organisational readiness

From Strategy to Measurable Outcomes

Measurable results within weeks—not months

Measurable improvements in alignment, flow, prioritisation, and delivery effectiveness can often be seen within weeks.

Lean Portfolio Management & Governance

Most organisations govern projects.

High-performing organisations govern value.

Traditional Governance

Project-centric

Annual planning cycles

Budget ownership

Delivery reporting

Local optimisation

Modern Portfolio Governance

Value-stream-oriented

Continuous prioritisation

Outcome ownership

Flow & value visibility

Enterprise alignment

The Toolbox enables connected governance from strategic investment decisions to operational delivery execution.

Operating Model Transformation

Operating models determine execution capability.

Traditional organisation

- Functional silos 
- Project-based coordination 
- Fragmented priorities 
- Handovers and delays 
- Slow decision-making 
- Limited outcome visibility 

Connected execution model

- Value streams
- Aligned governance
- Shared priorities
- Continuous flow
- Faster execution
- Measurable outcomes

AI-Ready Organisations

AI does not fix fragmented organisations.

It amplifies them.

Successful AI adoption requires:

- clear governance
- structured prioritisation
- connected data and delivery flows
- organisational adaptability
- measurable outcomes
- rapid feedback loops

Organisations that cannot execute consistently will struggle to scale AI successfully.

Selected Transformation Outcomes

Handelsbanken

Enterprise-wide transformation
~3,000 employees enabled
Lean Portfolio Management at scale

Liberty Global

Reduced time-to-market from 18
months to 3 months

Bank of Valletta

CRM transformation restructuring
~20 systems consolidated into
strategic roadmap
Improved governance and demand
quality

bwin games

Large-scale platform migration
~15 million users supported

Proven in Complex & Regulated Environments

Worked across:

- Banking & Financial Services
- Telecom & Digital Platforms
- Energy & Infrastructure
- Pharma & Life Sciences
- Public Sector
- Gaming & High-Scale Platforms

Supporting:

- Enterprise transformation
- Operating model evolution
- Integration-heavy environments
- Portfolio governance
- Delivery at scale

Trusted by organisations navigating complexity

TELIA

H&M

Swedbank 

vodafone

Nordea

AstraZeneca 

Handelsbanken

IBM

 telenor

Bombardier

ALSTOM

ERICSSON

Leadership & Founders

Mats Jegebo

Enterprise Transformation & Governance

Enterprise transformation leader specialising in governance, Operating Model Transformation, and large-scale execution.

30+ years across banking, telecom, energy, gaming, and pharma.

Specialising in:

- Lean Portfolio Management
- Operating Model Transformation
- Governance and delivery alignment
- Large-scale enterprise execution

Patrik Just

Organisational Alignment & Leadership Enablement

Strategic transformation coach focused on organisational alignment, leadership enablement, and operational adaptability.

25+ years supporting organisational transformation, leadership enablement, and operational evolution.

Specialising in:

- Organisational alignment
- Leadership enablement
- Value-stream-oriented execution
- Operational transformation

How We Support Organisations

Strategic Advisory

Helping leadership teams align strategy, governance, and execution

Portfolio & Delivery Governance

Improving investment alignment, decision-making, and execution visibility.

Operating Model Transformation

Designing scalable structures enabling flow, prioritisation, and measurable outcomes

Capability Enablement

Building long-term organisational capability through coaching, workshops, and leadership support
